

WATER ALARM WR

Are you looking for a simple but yet sufficient water alarm, then the WR-family can be your right choice. If you have other items in the R-series of smoke, heat & gas detectors you may like to add water detector.

Or if you like to have a water alarm connected to an external source of some kind you could attach the device or devices to an CM01 or a CM02 interface unit.

For more information, visit our website www.deltronic.se

WR1211

The radio based WR1211 combines the easiness of radio based equipment with the possibility of connecting to either a smoke and heat system or an interfaced relay for further connection to an external alarm transmitter of some kind. For best detection we recommend placements above a Wettex dish cloth, that absorbs and canalise the water to reach the detector.

Specification:

Article number	10420
Item name	WR1211
Low battery warning	Yes
Battery type	9V Alkaline
Standby current	7 uA
Alarm current	45mA
Expected Battery life	over 1 years
Low battery level & warning	Low battery signal sounds at least 30 days.
Frequency range	434.33 MHz
No. units to connect	Unlimited
No. different groups	16 including a priority group (0)
Colour	White
Packing	1 pcs / carton
Warranty	2 years
Approval	CE
Recommended replacement.	After water flood
Sound transmitter Piezo style	> 85dB at 3m
Manual	English
Mounting	Placement under water area
Dimensions of detector	Ø100 x 30 mm
External Sensor Option	Yes
External Relay	No
Ambient temperature	0 ° C to 45 ° C
Weight	70 grams with battery
Can be screen printed	Yes
